CURRICULUM

What you will learn

Hands-on education in the skills of the future

In this Scrum and Kanban course, you will acquire the most important skills based on a curriculum designed by industry experts. The Scrum and Kanban training includes industry-validated, interactive content at a university level and extensive hands-on experience in real projects. You will build a portfolio and complete the program with a capstone project.

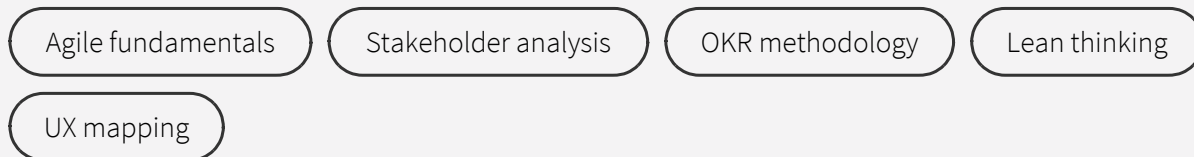

Module 1

Introduction to Product & Project Management

You gain a basic understanding of modern product and project management and learn how traditional and agile ways of working differ. This module forms the foundation for all subsequent content by conveying core concepts of agile work and their relevance for planning and forecasting.

Core Skills

Learning Outcomes

You will learn to:

- apply fundamentals of product and project management and differentiate between traditional and agile approaches
- recognize how digital transformation changes business models and the importance of agile methods for modern organizations
- apply basic agile principles to plan projects in a structured way and derive well-founded forecasts

Content

- Digital business models & digital transformation
- Modern ways of working: traditional vs. agile
- Agile principles & overview
- Value creation & strategic planning

Module 2

Kanban Fundamentals

You deepen your understanding of agile ways of working by learning the core principles of Kanban, visualizing workflows, and applying basic flow metrics. The previously established foundation is expanded with practical skills relevant across a wide range of team contexts.

Core Skills

Kanban boards

WIP limits

Flow metrics

Pull systems

Daily flow management

Learning Outcomes

You will learn to:

- apply Kanban principles to transparently visualize workflows
- apply WIP limits and analyze basic flow metrics to identify bottlenecks
- design initial pull systems and optimize simple team workflows

Content

- The Kanban board and flow
- WIP limits and flow metrics
- Kanban implementation

Module 3

Applying the Scrum Framework

You dive deeper into the Scrum framework and understand how self-managing teams work successfully. Key roles, responsibilities, and recurring meetings are explained step by step.

You also develop important artifacts such as sprint backlogs and user stories and transfer Scrum processes to practical project scenarios.

Core Skills

Scrum roles

User stories

Timeboxing

Sprint planning

Scrum events

Learning Outcomes

You will learn to:

- understand how Scrum teams work and how iterations, timeboxing, and increments contribute to continuously delivering working results
- know roles and responsibilities in Scrum teams and can deliberately support collaboration
- confidently conduct Scrum events and create relevant artifacts such as user stories and backlogs

Content

- Roles in Scrum

- Scrum team
- Scrum events
- Scrum artifacts

Module 4

Scrum with Kanban

You learn how Kanban principles and flow metrics are deliberately integrated into Scrum to increase transparency, predictability, and product quality. You use data-driven forecasts, optimize workflows within the sprint, and derive concrete improvement actions for your team based on flow data.

Core Skills

Learning Outcomes

You will learn to:

- understand how Kanban practices increase the efficiency of Scrum teams and how flow metrics make bottlenecks visible
- apply WIP limits and pull mechanisms within the sprint to optimize workflow and team performance
- create data-driven forecasts using flow metrics and derive realistic release and planning scenarios
- use flow data in retrospectives to drive targeted and continuous improvements

Content

- Kanban and flow in Scrum
- Flow within the sprint
- Metrics in planning and review
- Retrospectives with Kanban principles

Module 5

PSK I Exam Preparation

You prepare specifically for the official **Professional Scrum with Kanban™** I exam and become familiar with all exam-relevant concepts, formats, and specifics. In addition to structured content review, you receive practical tips on handling the exam format, answering multiple-choice questions, and managing your time. You also benefit from additional support materials and optional learning plans designed to sig-

nificantly increase your chances of success.

Core Skills

Exam strategies

Technical terminology

Time management

Multiple-choice techniques

Learning planning

Learning Outcomes

You will learn to:

- confidently classify and apply exam-relevant concepts, terms, and technical definitions
- understand the exam format, know which question types to expect, and prepare specifically for common pitfalls
- confidently apply strategies for time management, language comprehension (English exam), and multiple-choice questions
- use additional learning plans and in-depth resources to maximize your exam success

Content

- Core Kanban concepts for Scrum teams
- Structure and format of the PSK I exam
- Exam lab: clarification of common misconceptions
- Final exam preparation & learning strategies

Alexander Bunting

Ich fand den [Certified Produkt- und Produkt-Manager](#) Kurs sehr flexibel und zugänglich, und die Unterstützung, die ich erhalten habe, war ausgezeichnet. Die Möglichkeit, jederzeit und in meinem eigenen Tempo zu lernen, ist einfach perfekt.

Claudia Rüzgar

Meine Weiterbildung zum "[Certified Product & Project Manager](#)" konnte ich, auch ohne Vorkenntnisse zu haben, sehr gut abschließen. Erklärungen und Aufgaben waren leicht verständlich. Ein sehr guter Mentor, Wojta Prandell, stand mir während der gesamten Weiterbildung mit Rat und Tat zur Seite. Betreuung, Planung und Umsetzung sind optimal aufeinander abgestimmt.
